Allowable Subject Matter

1. Claims 3-7, 9, 11, 13, 16-18 and 19-22 allowed.

2. The following is an examiner's statement of reasons for allowance:

Amendments to the claims overcome the prior art rejections made in the previous action.

The prior art of record (Butter et al., U.S. 5,381,480) disclose an implementation of DES in hardware utilizing a calculation unit, producing a partial fraction of a DES output and sequencing the DES circuit to produce a DES output which combined with the KASUMI Specification's suggestion of the KASUMI hardware implementation. Butter and the KASUMI Specification fail to teach the hardware layout utilizing the multiple mux and shift register feedback structure in conjunction with the calculation controller as detailed in applicant's claims.

None of the other references cited in the prior action combine with Butter and the KASUMI Specification to disclose the amended limitations to the claims.

An updated search did not uncover any new prior art. No art disclosing, nor motivation to combine has been found which recites the specific hardware implementation of the KASUMI cipher system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
